# 2. HAZARDS IDENTIFICATION

### 2.1 Classification

This material is not considered hazardous by the 2012 OSHA Hazard Communication Standard (29 CFR 1910.1200) and WHMIS 2015 This chemical is not considered hazardous by the 2012 OSHA Hazard Communication Standard (29 CFR 1910.122)

Acute toxicity - Oral	Not classified
Acute toxicity - Dermal	Not classified
Acute toxicity - Inhalation (Gases)	Not classified
Acute toxicity - Inhalation (Vapors)	Not classified
Acute toxicity - Inhalation (Dusts/Mists)	Not classified
Skin corrosion/irritation	Not classified
Serious eye damage/eye irritation	Not classified
Respiratory sensitization	Not classified
Skin sensitization	Not classified
Germ cell mutagenicity	Not classified
Carcinogenicity	Not classified
Reproductive toxicity	Not classified
Specific target organ toxicity (single exposure)	Not classified
Specific target organ toxicity (repeated exposure)	Not classified
Aspiration toxicity	Not classified
GHS Physical Hazard Category Number	None

### 2.2. Label elements

Not a dangerous substance or mixture according to the Globally Harmonized System (GHS)

#### Hazards not otherwise classified (HNOC)

#### 2.3 Other information

Other hazards

Unknown acute toxicity

Not applicable

- · Harmful to aquatic life
- · Avoid release to the environment

12.73997098% of the mixture consists of ingredient(s) of unknown toxicity

# **3. COMPOSITION/INFORMATION ON INGREDIENTS**

#### 3.1 Substances Not applicable

## 3.2 Mixtures

#### **Non-Hazardous Components**

Chemical Name	CAS-No	Weight %
Mineral Base Stock	MIXTURE	85-90

4. FIRST AID MEASURES	

# 4.1 First Aid Measures

General Advice	If symptoms persist, call a physician. Show this safety data sheet to the doctor in attendance.		
Eye Contact	Immediately flush with plenty of water. After initial flushing, remove any contact lenses and continue flushing for at least 15 minutes. Keep eye wide open while rinsing. If eye irritation persists, consult a specialist.		
Skin Contact	Wash off immediately with soap and plenty of water while removing all contaminated clothes and shoes. If skin irritation persists, call a physician.		
Inhalation	Move to fresh air in case oxygen. If not breathing,	of accidental inhalation of vapors. If breathing is difficult, give give artificial respiration. Call a physician immediately.	
Ingestion	Do not induce vomiting without medical advice. If vomiting occurs naturally, have casualty lean forward to reduce the risk of aspiration. Call a physician or Poison Control Center immediately.		
Protection of First-aiders	Use personal protective equipment. Avoid contact with skin, eyes and clothing.		
4.2 Most important symptoms and	effects, both acute and	delayed	
Symptoms	No information available		
4.3 Indication of any immediate me	dical attention and spec	ial treatment needed	
4.5 indication of any inmediate me			
Notes to Physician	Treat symptomatically.		
	Treat symptomatically.		
Notes to Physician	Treat symptomatically.	NFPA: Class IIIB Combustible Liquid	
Notes to Physician 5. FIRE-FIGHTING MEASUR	Treat symptomatically.		
Notes to Physician 5. FIRE-FIGHTING MEASUR Flammable Properties	Treat symptomatically.	NFPA: Class IIIB Combustible Liquid Use extinguishing measures that are appropriate to local	
Notes to Physician 5. FIRE-FIGHTING MEASUR Flammable Properties 5.1 Suitable Extinguishing Media	Treat symptomatically.	NFPA: Class IIIB Combustible Liquid Use extinguishing measures that are appropriate to local circumstances and the surrounding environment	
Notes to Physician 5. FIRE-FIGHTING MEASUR Flammable Properties 5.1 Suitable Extinguishing Media Unsuitable Extinguishing Media	Treat symptomatically.	NFPA: Class IIIB Combustible Liquid Use extinguishing measures that are appropriate to local circumstances and the surrounding environment Do not use a solid water stream as it may scatter and spread fire. Keep product and empty container away from heat and sources	

# 6. ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures

Personal precautions	Avoid contact with the skin and the eyes. Use personal protective equipment. Remove all sources of ignition. Avoid breathing vapors or mists. Ensure adequate ventilation.

6.2 Environmental Precautions

Environmental Precautions	Prevent further leakage or spillage if safe to do so. Prevent product from entering drains. Do not allow material to contaminate ground water system. Do not flush into surface water or sanitary sewer system. Large Spills: Dike far ahead of liquid spill for later recovery and disposal. Prevent entry into waterways, sewers, basements or confined areas. Avoid contact with spilled material. Warn or evacuate occupants in surrounding and downwind areas if required due to toxicity or flammability of the material. See Section 3 for Significant Hazards. See Section 5 for fire fighting information. See Section 4 for First Aid Advice. See Section 8 for Personal Protective Equipment.
6.3 Methods and material for conta	inment and cleaning up
Methods for Clean-up	Contain and collect spillage with non-combustible absorbent material, (e.g. sand, earth, diatomaceus earth, vermiculite) and place in container for disposal according to local / national regulations (see section 13).
Spill Management	
LARGE SPILLS	Eliminate sources of ignition. Prevent additional discharge of material if possible to do so without hazard. For small spills implement cleanup procedures; for large spills implement cleanup procedures and, if in public area, keep public away and advise authorities. Also, if this product is subject to CERCLA reporting (see Section 15 Regulatory Information) notify the National Response Center.
WATER SPILLS	Prevent liquid entering sewers, watercourses, or low areas. Contain spilled liquid with sand or earth. Recover by pumping or with suitable absorbent. If liquid is too viscous for pumping, scrape up. Consult an expert on disposal of recovered material and ensure conformity to local disposal regulations.

# 7. HANDLING AND STORAGE

## 7.1. Precautions for safe handling

Handling	Wear personal protective equipment. Do not breathe vapors or spray mist. Remove and wash contaminated clothing before re-use. Keep away from open flames, hot surfaces and sources of ignition. Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapors).
Safe Handling Advice	Handle in accordance with good industrial hygiene and safety practices.
7.2. Conditions for safe storage, including any incompatibilities	
Storage	Keep in properly labeled containers. Keep container tightly closed in a dry and well-ventilated place.
Incompatible Materials and/or Coatings	No information available

# 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

## 8.1 Control parameters

Other Exposure Guidelines (If Generated)

Chemical Name	OSHA PEL	ACGIH TLV	ACGIH OEL (STEL)	NIOSHT REL TWA	ILA IHG	ILA ROEG	ILA Internal Exposure Limit
Oil mist, mineral	TWA: 5 mg/m <sup>3</sup>	TWA: 5 mg/m <sup>3</sup>		TWA 5 mg/m <sup>3</sup> ST 10 mg/m <sup>3</sup>			

#### 8.2. Exposure controls

Appropriate engineering controls	Ensure adequate ventilation, especially in confined areas. Consider the potential hazards of this material (see Section 2), applicable exposure limits, job activities, and other substances in the work place when designing engineering controls and selecting personal protective equipment. If engineering controls or work practices are not adequate to prevent exposure to harmful levels of this material, the personal protective equipment listed below is recommended. The user should read and understand all instructions and limitations supplied with the equipment since protection is usually provided for a limited time or under certain circumstances.
Personal Protective Equipment	
Eye/face protection	Safety glasses equipped with side shields are recommended as minimum protection in industrial settings. If splashes are likely to occur wear tight fitting safety goggles and/or face-shield.
Skin protection	Wear protective gloves/clothing. Choose the appropriate protective clothing / gloves based on the tasks being performed to avoid exposed skin surfaces. <b>Glove Type:</b> Neoprene, Nitriles.
Respiratory protection	If exposure limits are exceeded or irritation is experienced, NIOSH/MSHA approved respiratory protection should be worn. Positive-pressure supplied air respirators may be required for high airborne contaminant concentrations. Respiratory protection must be provided in accordance with current local regulations.
General Hygiene Considerations	When using, do not eat, drink or smoke. Clean equipment, work area and clothing regularly.

# 9. PHYSICAL AND CHEMICAL PROPERTIES

## 9.1. Information on basic physical and chemical properties

Appearance	Clear Red
Physical State	Liquid
Odor	Mild
Odor Threshold	No information available
pH	Not applicable
Melting point / melting range	Not applicable
Boiling point / boiling range	No information available
Flash Point Evaporation Rate Flammability Limit in Air Explosion Limits Vapor Pressure Vapor Density (Air) Density	<ul> <li>&gt; 170 °C / 338 °F COC ASTM D92</li> <li>No information available</li> <li>0.85 g/cm<sup>3</sup> @15°C</li> </ul>
Solubility	No information available
Partition Coefficient (n-octanol/water)	No information available
Autoignition Temperature	No information available
Decomposing Temperature	No information available
Viscosity	@ 40C = 29.83 cSt; @ 100C = 7.10 cSt

## **Other Information**

DMSO extract by IP346	Less than 3.0 wt% (mineral oil component only)
10. STABILITY AND REACTIVITY	
10.1 Reactivity	
Reactivity	The product is chemically stable
10.2 Chemical stability	
Chemical Stability	Hazardous polymerization does not occur. Stable under normal conditions.
10.3 Possibility of Hazardous Reactions	
Possibility of Hazardous Reactions	None under normal processing.
10.4 Conditions to Avoid	
Conditions to Avoid	Heat, flames and sparks.
10.5 Incompatible Materials	
Incompatible Materials	Strong oxidizing agents.
10.6 Hazardous Decomposition Products	
Hazardous decomposition products	Thermal decomposition can lead to release of irritating gases and vapors.

# **11. TOXICOLOGICAL INFORMATION**

## 11.1 Information on likely routes of exposure

Inhalation	May cause irritation of respiratory tract.
Eye contact	May cause slight irritation.
Skin Contact	May be harmful in contact with skin.
Ingestion	May be harmful if swallowed.

# 11.2 Information on toxicological effects

Symptoms
----------

No information available.

# 11.3 Delayed and immediate effects as well as chronic effects from short and long-term exposure

Skin corrosion/irritation	No information available.
Serious eye damage/eye irritation	No information available.
Sensitization	No information available.
Mutagenic effects	No information available.

11.4 Carcinogenicity

Carcinogenicity	No component of this product present at levels greater than or equal to 0.1% is identified as a known or anticipated carcinogen by NTP, IARC, OSHA, or ACGIH. The petroleum base oils contained in this product have been highly refined by a variety of processes including solvent extraction, hydrotreating, and dewaxing to remove aromatics and improve performance characteristics. All of the oils meet the IP-346 criteria of less than 3 percent PAH's and therefore none are listed as a carcinogen by NTP, IARC, or OSHA
	, ACGIH: (American Conference of Governmental Industrial Hygienists), IARC: ch on Cancer), OSHA: (Occupational Safety & Health Administration)
Reproductive Effects	Not available.
STOT - single exposure	None known.
STOT - repeated exposure	None known.
Chronic Toxicity	Avoid repeated exposure.
Aspiration hazard	No information available.
11.5 Acute Toxicity	
Unknown acute toxicity	12.73997098% of the mixture consists of ingredient(s) of unknown toxicity
The following values are calculated	based on chapter 3.1 of the GHS document
Product Information (Estimated	I <u>):</u>
ATEmix (oral) ATEmix (dermal) ATEmix (inhalation-dust/mist)	5217 mg/kg 2088 mg/kg 5.1 mg/l
12. ECOLOGICAL INFORMA	TION
12.1 Ecotoxicity Ecotoxicity effects	Harmful to aquatic life

	Plants and animals may experience harmful or fatal effects when coated with petroleum products. Petroleum-based (mineral) lubricating oils normally will float on water. In stagnant or slow-flowing waterways, an oil layer can cover a large surface area. As a result, this oil layer might limit or eliminate natural atmospheric oxygen transport into the water. With time, if not removed, oxygen depletion in the waterway may be sufficient to cause a fish kill or create an anaerobic environment.
Unknown aquatic toxicity	14.16242% of the mixture consists of components(s) of unknown hazards to the aquatic environment
12.2 Persistence and degradability	No information available.
12.3 Bioaccumulation/Accumulation	No information available
12.4. Mobility in soil	No information available
PBT and vPvB assessment	No information available
12.5 Other adverse effects:	No information available

# **13. DISPOSAL CONSIDERATIONS**

Hazard characteristic and regulatory waste stream classification can change with product use. Accordingly, it is the responsibility of the user to determine the proper storage, transportation, treatment and/or disposal methodologies for spent materials and residues at the time of disposition.

To minimize exposure, see Section 8 (Exposure Controls/Personal Protection) of the SDS.

Waste Disposal MethodThis material, as supplied, is not a hazardous waste according to Federal regulatio CFR 261). This material could become a hazardous waste if it is mixed with or oth comes in contact with a hazardous waste, if chemical additions are made to this material is processed or otherwise altered. Consult 40 CFR 261 to determine the altered material is a hazardous waste. Consult the appropriate state, regional, regulations for additional requirements.	aterial, or e whether
